

---

**Categorization:** Added questions about preferred categories and customization options, such as "What categories would you like to see for different insurance types?" and "Would you prefer users to customize these categories?"

**Reminder Feature:** Added questions on preferred notification methods and reminder types, such as "Would you prefer to receive notifications via email, text, or in-app notifications?" and "Besides renewal reminders, what other reminders would you need?"

**Security:** Added questions about multi-factor authentication and how the system should display data protection measures.

**Claims Progress:** Expanded questions to include real-time notifications and the option to display an estimated completion time.
